Transfer of alphanumerical data to punch cards

Real Estate Database

Cadastre and Land Register in one hierarchical database

Digitalisation (vectorisation) of cadastral maps

CAD to GIS Transformation

Digitalisation of distribution process

Further digitalisation of distribution process

Relaunch of Real Estate Database

Digitalisation of parcel modification process

Reduction in long running cases

Increase in short running cases

Map Certification issued within one or two weeks

Common Vision Conference 2017

Virtualisation of work environment

Missing Pieces

Digitalisation of the historical cadastre archives

Approx. 4,2 million documents with 55,4 m. pages

Digitalisation of the historical cadastre archives

Further digitalisation of input process

Metadata

Common Vision Conference 2017

Geospatial PDF?

Challenges

- Complexity
 - data (historical data, exceptions, inconsistencies)
 - processes (exceptions, procedures in different states of progress)
 - systems (large number of internal and external systems to be integrated)
 - players and stakeholders (inter agency cooperation, independence of jurisdiction, stakeholder interests, ...)

Challenges

- Quality
 - number of components (99%^100=37%)
 - competition with legacy applications at end of lifecycle with years of CIP

Challenges

- Resources
 - Staff
 - Funds
 - Procurement rules

Response

- Provide useful services
- Be digital enough
- Find partners
- Get the timing right

Thanks to my colleagues

Dientl Franz, Helmut Skorpil (Virtualisation of work environment)

Georg Topf (Digitalisation of the historical cadastre archives)

Stephan Klotz (Structured PDF)

Thank you for your attention
