

Smart Cities/Smart Buildings

..... A Short Tale of Two Scales

James Kavanagh RICS – WPLA/CLRKEN workshop 21st April –
session 3

Content

- - **A brief introduction to BIM & Smart Cities**
 - **Smart cities, dumb buildings**
 - **Interoperability and standards**
 - **The sharp end – funding mechanisms PPP**
 - **Different governance structures, buildings as ‘super’ sensors**
 - **Conclusions**

The BIM challenge

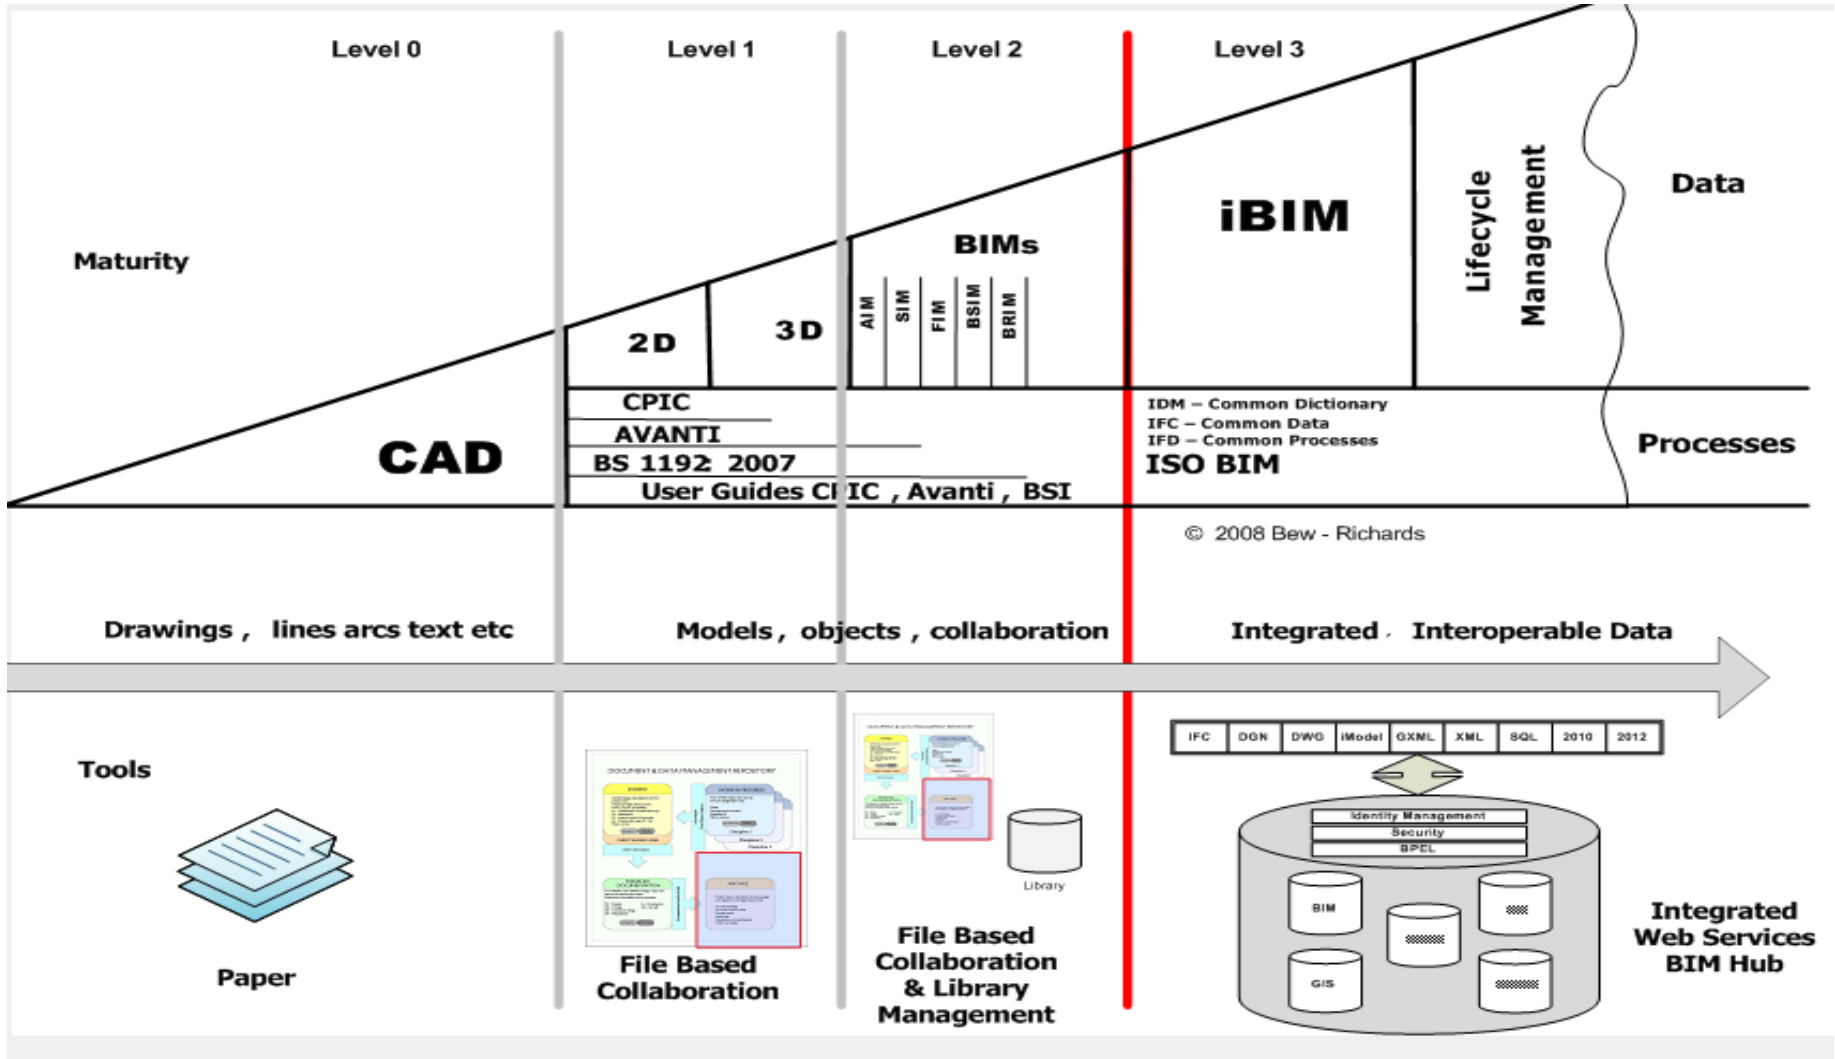

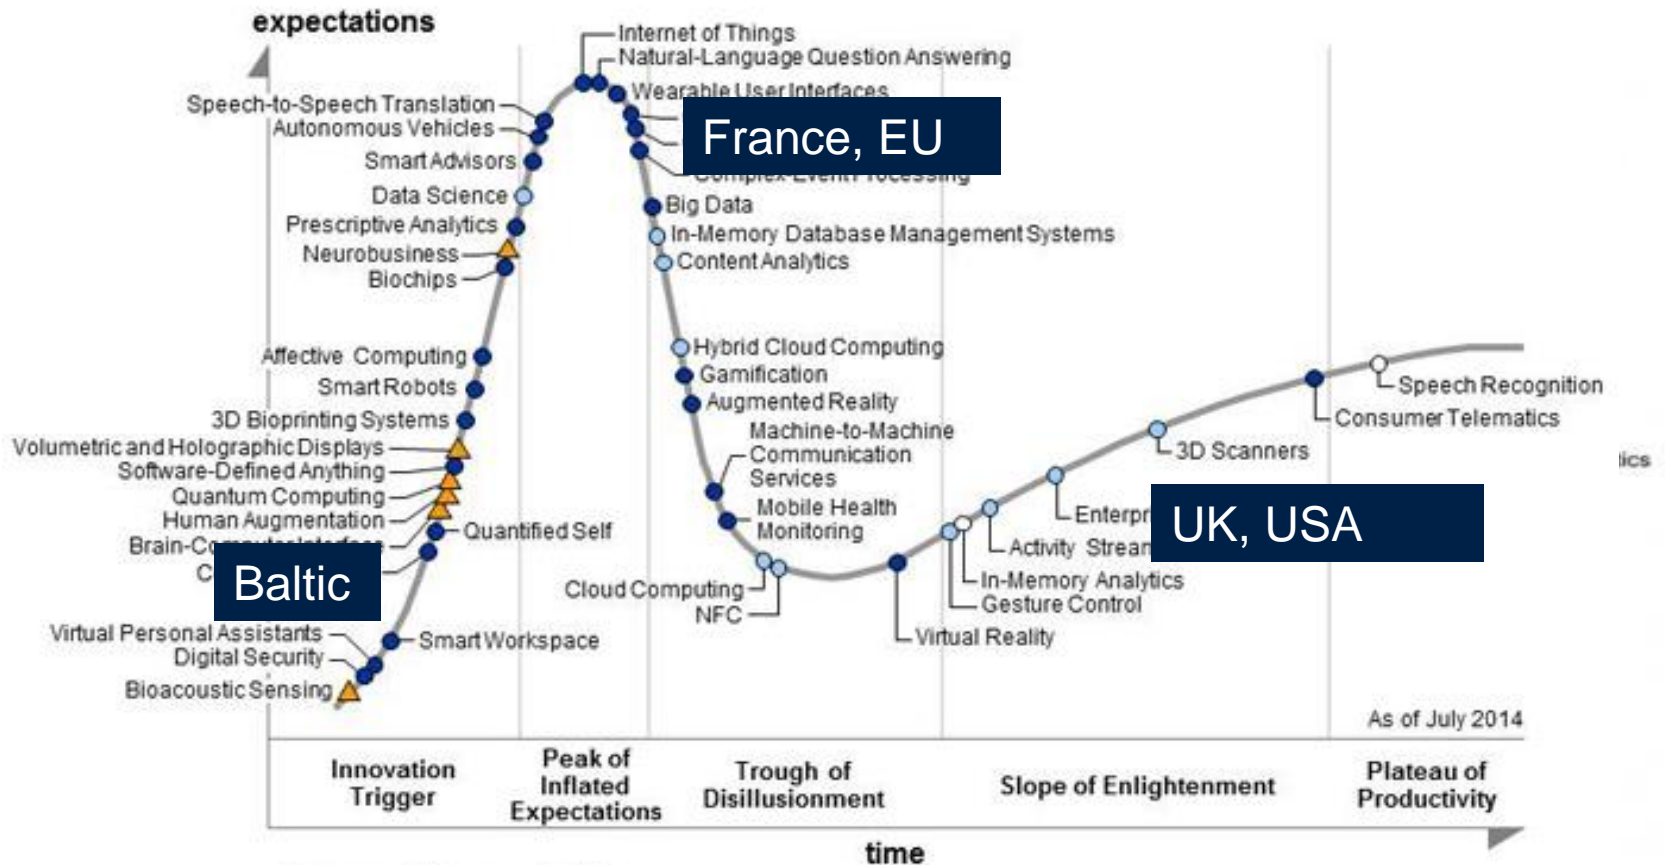

Subdivision Data Elements	
Property	Value
Land Use	Residential
Legal Object Unit	Multipart
Lot Entitlement	35
Lot Liability	55
Lot Name	LOT-406
Owner Name	Mr. Andrew Wilson
Owner Share	100
Owner Type	Person
Title Folio	724
Title Security Number	623542
Title Volume	10563
Volume of Parent Title	03242

The BIM challenge

Capex & Opex cost data sets

Plateau will be reached in:

○ less than 2 years

● 2 to 5 years

● 5 to 10 years

▲ more than 10 years

⊗ obsolete before plateau

What's so Smart about a Smart City?

▪
A Smart City provides effective integration of physical, digital and human systems in the built environment to deliver a sustainable, prosperous and inclusive future for its citizens

Smart City Indicators

- ▶ ISO/DIS 37120 - Sustainable development and resilience of communities — Indicators for city services and quality of life
- ▶ OGC Smart Cities Spatial Information Framework
- ▶ UNECE – Smart urban solutions for developing countries

Economy, Education, **Energy**, Environment, Recreation, Safety, Shelter, **Solid waste**, Telecommunications and innovation, Finance, Fire and emergency response, **Governance**, **Health**, **Transportation**, **Urban planning**, Wastewater, **Water and sanitation**

Standards and scale

The screenshot displays the BSI website interface. At the top, the BSI logo and tagline "...making excellence a habit." are visible, along with contact information for the United Kingdom (+44 20 8996 7297). The navigation menu includes Home, Standards (e.g. ISO 9001), Our services, Industry sectors, and About BSI. A search bar is present on the right.

The main content area is titled "Smart Cities" and lists "The following: city to become" with a list of items: "The deve", "The deve", "The deve", "A Smart", and "A Smart". Below this, a "Related smart" section lists "An indica (BS ISO 3", "Research", and "A specific 3715)".

The "bsi. | shop" section is active, showing a search bar and a list of products under "Browse by Sector". The "BIM: Building Information Modelling" product page is highlighted, featuring a 3D architectural rendering of a building. The text states: "BIM Level 2 is here. The BIM Level 2 suite of documents have been developed to help the Construction industry adopt BIM Level 2. These documents consists of: - BS 1192:2007+A2:2016 - PAS 1192-2:2013 - PAS 1192-3:2014 - BS 1192-4:2014 - PAS 1192-5:2015 - BS 8536-1:2015". It also mentions that the documents are available for free download due to sponsorship from the Department of Business, Energy & Industrial Strategy (BEIS) and the Building Information Modelling (BIM) Task Group.

A red banner below the BIM section reads: "Visit the official BIM Level 2 website to download the BIM suite of standards for free".

The right sidebar contains a "Your basket" section (empty), a "BSOL" section with the text "The faster, easier way to work with standards", and social media links for LinkedIn, Facebook, and YouTube.

At the bottom, there are sections for "Building & Construction" and "BSI Events". The "Building & Construction" section says "Check BSI's latest Building & Construction Standards. Find out more". The "BSI Events" section says "Join us at our events and find out more about the latest standards. New bookings".

The Windows taskbar at the bottom shows the system clock as 16:53 on 18/04/2017.

The business end of 'smart'

Smart Cities issues

Interoperability

- City scale v Site scale
 - City planning v Building design
 - Public interest governance v Private interest governance
 - Public sector objectives v Private sector objectives
 - Public data v Private data
- ▶ Planners, Developers, Surveyors & Architects

Macro, meso and micro scale data issues – what about the ‘street’?

Soft Infrastructure – Placemaking, economic viability, market economics

Smart Cities

Economic drivers

Global market estimate £400 billion by 2020

UK market estimate £40 billion by 2025

- Transport – 170 new mass transit systems in China by 2025
- Energy – Berlin 220k rooftops producing 3 million megawatts
- Health care - \$1.2 trillion investment in India
- Water – freshwater crisis in Africa
- Waste – 75% of global carbon emissions
- Telecoms – Digital Smart Nation Singapore

Smart Building

Economic drivers

Procure, deliver and operate the built environment

- ❑ UK construction employs over 3 million people
- ❑ Delivers £107 Billion output (2010)
- ❑ Key contributor to UK growth
- ❑ Critical in meeting UK Climate Change Targets
- ❑ Growing Facility/Asset Management sector
- ❑ Level 2 BIM case studies secured 20% capital savings against 2009/10 benchmarks
- ❑ Global construction forecast to grow by over 70% by 2025

5 Key Areas to Support Smart City Aspirations

1. Build the partnerships to deliver holistic solutions
2. Build the foundation for widespread exploitation of data
3. Use digital modelling to deliver a people-centred physical environment
4. Put in place an enabling digital and communications infrastructure
5. Develop and test new business models and processes

New Government Funding

Key measures

1. Create new international 'Open Data' standards
2. Establish new contractual framework for projects procured with BIM
3. Create a cultural environment which is co-operative, learning and sharing
4. Training public sector client in use of BIM techniques
5. Driving domestic and international growth and jobs in technology and construction

City Information Modelling (CIM)

Seamless connection ?

Innovation UK - Future Cities Demonstrators

Glasgow, UK

- ❑ Awarded £24 million
- ❑ Integrate transport, communications and other infrastructure
- ❑ To improve city's economy and quality of life
- ❑ Reduce environmental impact

Bristol, UK 'Bristol is Open'

- ❑ Test-bed – programmable city
- ❑ Conversion of old cable television network to superfast fibre
- ❑ JV University of Bristol, Bristol City Council, NEC - £75m

Conclusions

- ▶ **Energy and telecommunications capacity**
- ▶ **Centrality of Open Standards and geospatial data**
- ▶ **Interoperability**
- ▶ **Policy – Planning Policy & Data provision as part of the ‘approval’ process**
- ▶ **Public Private Initiatives – incentivising development**
- ▶ **Soft infrastructure**
