Sede Electrónica del Catastro

Amalia Velasco Martín-Varés, International Affairs Coordinator Spanish Directorate General for Cadastre

what we are talking about

Private restrictions (morgatges) VS public restrictions (protected site, urban planning)

Public restriction VS Public real estate (heritages, road, railways, airports)

Land restriction VS other restrictions

Comun restrictions VS particular restrictions

Integrate (as attribute of parcel) VS interoperable

Legal act VS not legal act

Fixed boundaries VS aproximatly

Basic Data

7595 municipalities (without Navarra and País Vasco)

- 52 M parcels (urban and rural)
- 64 M building elements
- 38 M urban real estates
 - (plots, condominiums, apartments, parkings)
- 28 M owners
- Also public real estate
- Also cultural heritage real estates

Main taxk of the Spanish Cadastre is to describe the real estates and to give them a value.

Administrative concession on property of the estate are also included

The Cadastral Information System is a dynamic, open system with numerous flows of interchange of information with multiple external agents who interact with the Cadastre's databases both as suppliers of information and as users and clients

SECRETARIA DE ESTADO DE HACIENDA

DIRECCIÓN GENERA

The declaration to the cadastre of any change in the real estate description is obligatory by law

The cadastral law also point out the obligation of notaries, property registrars, local authorities and other public institutions that act over the territory to communicate all change in the characteristics of the real estates to the cadastre.

– <u>Identification data</u>:

» cadastral reference, province, municipality, addresses or location.

- Juridical data:

» Titleholders' name and national identity number, addresses of titleholders and the notification address, date of acquisition and rights data.

- Physical data:

» land area, buildings area, class of crops, coordinates.

Economic data:

Real Estate

use (legal and actual one), value of land, value of construction and cadastral value, criteria and valuating module, real estate taxable value, exemptions and benefits.

The "comunications" frees the citizen to declare the fact or legal issue

Other agents that works in the territory

- ✓ Obligation to communicate changes in the real estates
- And also agreements to share information

Expropiations (roads, railway....., land consolidations, urban planing, irrigation license, vineyard or olive trees licences, other grows licences)

The Agriculture Department...

The Environmental Department...

The Land Registers...
The Urbanism Department...

The SIGPAC...

Irrigation Plans...

Demarcation of Public Property Boundaries...

Roads...

Train company Police...

REE (Spanish Electrical Network)...

- ✓ The strategy consists of envolving other Public Administrations, as well as other organisations, sharing useful information for all of them
- ✓ They are all provider and beneficiary of The Spanish General Directorate for Cadastre: they help us in keeping our data base updated, while they obtain all necessary data for their purpose
- ✓ Collaboration means breakingdown several bureaucratic and technical procedures. This is an adventage for the citizens and means cutting down expenses for our organization
- 95 **√ How**:
 - ✓ Data are electronically provided by them; they can even process the information working directly in our system or sending data through the Cadastral virtual ofice
 - √ Web service with information

In this collaborative scenario

Should public restriction be included as attibute of cadastral parcels?

INSPIRE principles:

Data should be collected only once and kept where it can be maintained most effectively.

It should be possible to combine spatial information and share it with many users and applications.

It should be possible for information collected at one level/scale to be shared with all levels/scales;

Geographic information needed for good governance should be readily and transparently available.

Easy to find what geographic information is available, how it can be used to meet a particular need, and under which conditions it can be acquired and used.

Public Land Restrictions can be of very different nature, Some are integrate in the data base and other not Other are included punctully

Responsability of other organizations

3. Agreements. Other agents that works in the territory

LAND VALUE MAP

SECRETARIA DE ESTADO DE

DIRECCIÓN GENERAL DEL CATASTRO

The edificability is the amount of square meters you can build in total, in proportion to the land of the parcel. The unit is expressed in "m2/area of the land"

It is crucial for the value of the land.

Some of the restriction are included as atribute of the parcels and we use them in the valuation. For example:

VPO Viviendas de protección. Oficial. Subsidized housing

Some of the restriction are included as atribute of the parcels and we use them in the valuation. For example:

Restriction to cultivation: irrigation, forest, tree plantations, olives, vineyards...

•some rights

From June 2015 they are obligatory comunicated to the cadastre by the agricultural department

SECRETARÍA DE ESTADO DE HACIENDA

DIRECCIÓN GENERAL DEL CATASTRO

Currently the valuation of rural areas it is a capitalitation of potential rent value for each growth in the parcel.

For this reason it is important now to know if it is irrigation, forest, vinayard, olive etc...

New valuation model:
Market value (other factors)

•Dynamics of real estate market

•Distance to urban zone:

• Degree of urbanization:

grows

Market values

agricultural potential areas (slope, rainfall, temperature)

Protectect sites.
Public restrictions.

Public restrictions will be important in the new valuation

Conclusions and a quesstion

Public real estate are included in the cadastre

Public organizations that are responsible of establish any public restriction must provide us this information via WMS

If there are any change in the description of the real estate (ej. Expropriation, change of urban planning etc..., change of title holder, change of title etc...) they must provide it in digital web via cadastral virtual office in the way and format defined by law.

Some of the restriction, the one that are included in the valuation algorithms, must be included as attribute of the real estate

- •as it is now the case
 - urban parameters in urban real estate,
 - some rights of grow (veneyards, olive trees etc..)
- •and it will be soon with other restriction in the new rural valuation model

Other restriction will always available in combination with cadastral information in the cadastral virtual office

Shall we be in dark green?
