

Workshop

**“Use of INSPIRE data:
past experiences and scenarios for
the future“**

Warsaw –20-21 November 2018

Workshop organisers

- **INSPIRE KEN:**
 - Knowledge Exchange Network
 - Since 2011
 - EuroGeographics group
 - EuroGeographics : National Mapping and Cadastral Agencies association)
 - Objectives: share knowledge about INSPIRE implementation
 - Means:
 - BaseCamp
 - Webinars
 - **Workshops**

Context

- INSPIRE KEN previous activities:

- **According to the INSPIRE roadmap**

- Services
- **Data transformation**
- Validation

Focus on the production
of INSPIRE data and
services

- According to MIG actuality

- **According to our members wishes**

Context

- A long lasting demand: use of INSPIRE data (interoperability)
- Benefits of INSPIRE are widely recognised regarding discovery, services, data sharing
- But it seems **there is (very) limited use of INSPIRE interoperable data**
 - national users like national products; they don't need INSPIRE
 - INSPIRE data models are too complex ; no GIS can consume INSPIRE data
 - Even the European Commission is not so keen to use INSPIRE data
 -

Objectives

- Better understand which are the **main drivers**
 - Day 1 : users and use cases
- Make state-of-play about existing **barriers and how to remove them**
 - Day 2 : technical issues and existing or potential solutions
- Identify **what can be done** to improve the current situation
 - Discussion sessions

Workshop outcomes

- Outcomes
 - Power Point presentations on **public** Web Site of EuroGeographics
 - If disagreement, presenters to send me an e-mail before 01/12/2018
 - Video-recording
 - Minutes of discussion (if relevant)
 - Group photo
- Main conclusions generally presented during next INSPIRE conference
 - But will be only in 2020
- **The knowledge you will bring back home!**

Thanks

- To the presenters
- To EuroGeographics (funding)
- To Gugik (hosting)
