How INSPIRE could better support EU GIS analysts

Julien Gaffuri – Eurostat/GISCO

EuroSDR/EuroGeographics workshop on "Use of INSPIRE data: past experiences and scenarios for the future"

27/28 November 2018 (Warsaw, Poland)

About GISCO

- *Service of the European Commission (Eurostat)*
- *Role: Answer needs of European Commission for geographical information at EU/national/regional levels.*
  - **Provision of GIS (reference) data, services and software**
  - **Support cartographic and spatial analysis activities**
  - **Support activities on the integration of statistical and geospatial information**
  - **Coordinates commission-wide GI activities**
  - **Stimulate the use of GIS to support commission activities**
Overall data needs

- *Thematic scope*
- *Geographical extent*
- *Cross-country comparability*
- *Resolution – level of detail*
- *Timeliness and update frequency*
- *Access, licensing and sustainability*

- ***How could <u>INSPIRE data</u> better support these needs?***

Thematic scope

- *Main strength of INSPIRE: Broad thematic scope.*

ANNEX: 1

- Addresses
- Cadastral parcels
- Geographical grid systems
- Hydrography
- Transport networks

- Administrative units
- Coordinate reference systems
- Geographical names
- Protected sites

ANNEX: 2

- Elevation
- Land cover

- Geology
- Orthoimagery

ANNEX: 3

- Agricultural and aquaculture facilities
- Atmospheric conditions
- Buildings
- Environmental monitoring Facilities
- Human health and safety
- Meteorological geographical features
- Natural risk zones
- Population distribution and demography
- Sea regions
- Species distribution
- Utility and governmental services

- Area management / restriction / regulation zones & reporting units
- Bio-geographical regions
- Energy Resources
- Habitats and biotopes
- Land use
- Mineral Resources
- Oceanographic geographical features
- Production and industrial facilities
- Soil
- Statistical units

Thematic scope

- *Uncovered needs:*
  - **Economic activities**
  - **Energy production and transport**

Geographical extent

- *Need for pan-European datasets*

TN - Sarrland

# AU – Data from NMCA websites

# Need for pan-European datasets

- *Edge-matched*
- *Geometrically and semantically harmonised*
- *Cross-thematic consistency*

Need for pan-European datasets

- *Need for cross-country comparability « spatial interoperability »*

Need for multi-resolution data

Resolution

Local   Regional   National   European   Global

1:50k   **1:1M**

European Commission

Need for multi-resolution data

Scale axis (top to bottom): Global, European, National, Regional, Local, Municipal, Vicinity, Individual

Theme axis: Boundaries, Infrastructures, Water, Terrain, Air

Chart labels: GN, OI, EL, SU, AU, PS, GE, MR, LC, HY, AM, TN, AC, CP, AD, BU

AM: management zones
PS: protected sites
SU: statistical units
AU: administrative units
CP: cadastral parcels
AD: addresses
GN: geographical names
OI: orthoimageries
LC: land cover
TN: transport
HY: hydrography
BU: buildings
EL: elevation
GE: geology
MR: mineral ressources
AC: atmospheric conditions

European Commission

Timeliness and update frequency

- *No explicit requirement on updates in INSPIRE*

- *Ultimate goal: Continously updated data*

Access, licensing and sustainability

- *Easy access (download link)*
  - **Weak need for harmonised network services, formats and CRS**
- *Non-restrictive licensing conditions*
  - **Priority for EC-internal use. Public sector access.**
  - **Sub-contractors**
- *Sustainability of the data source*
  - **Short term availability + Long term maintenance**
  - **Stable identifiers**

Building – Belgium

Overall data needs

- *Thematic scope*
- *Geographical extent*
- *Cross-country comparability*
- *Resolution – level of detail*
- *Timeliness and update frequency*
- *Access, licensing and sustainability*

European Commission

Need for centralisation

- *Most of these requirements cannot be met together in a distributed SDI infrastructure*
    - **Integration, edge-matching, generalisation, continuous updating**
- *Need for a new generation SDI with centrally-managed components*
