

# Cadastral in Europe – Networks and Platforms

Daniel Steudler  
Chair CLRKEN

PCC/CLRKEN-Conference  
Vienna, Austria, 20-21 Nov. 2018

## Wrap-up of Conference

- we all aim for better reliability
- how we do that, depends very much on the national context and status of our systems
- digital transformation is happening
- digital society → need for speed
- reliability also means good quality
- authoritative data and services

"With the introduction of computerization, you can solve nearly all the problems, it creates!"

"In God we trust; all others need to bring data."

## Information

- presentations will be put on the website of PCC and EuroGeographics-CLRKEN
- we are preparing a report of the conference

## Cadastral in Europe – Networks

- PCC / EuroGeographics-CLRKEN / UN-ECE WPLA / ELRA / FIG (Commission 7) / CLGE
- World Bank / FAO / UN-GGIM / ...
- INSPIRE / EuroSDR / EULIS / ...
- aim is to cooperate, in order to establish know-how exchange among professionals
- establish networks and learn from each other
- avoid duplication

## Cadastral in Europe – Networks

- the question, however, is:
  - are we making progress?
  - are we learning from each other?
  - are we successful in spreading the know-how among our professional colleagues?
  - is coordination of projects happening?
  - is networking taking place on a broad scale?
  - what about non-EU countries?
  - what about cooperation with our partners: e.g. land registry, spatial data infrastructures, clients and customers, ...?

## EuroGeographics-CLRKEN

- our strategy is to cooperate and to be part of joint events
- we have a strong and stable network
- KEN = Knowledge Exchange Network
- we partner up with activities that benefit the EuroGeographics members
- we aim to cooperate also with non-EU member countries
- our issue is the visibility within the PCC activities, EuroGeographics members should be allowed to participate in PCC events

### EU Presidencies

2018	Jan–Jun	 Bulgaria
	Jul–Dec	 Austria
2019	Jan–Jun	 Romania
	Jul–Dec	 Finland
2020	Jan–Jun	 Croatia
	Jul–Dec	 Germany
2021	Jan–Jun	 Portugal
	Jul–Dec	 Slovenia
2022	Jan–Jun	 France
	Jul–Dec	 Czech Republic
2023	Jan–Jun	 Sweden
	Jul–Dec	 Spain

## Cadastral in Europe – Platforms

- Google Maps
- ELS

Four Recommendations from Think Tank "Dimension Cadastral" in Switzerland (2017):

- Geodata Science
- **Meta-Platforms**
- Blockchain Technology
- Smart Data for Smart Cities

## Open ELS – EuroGeographics' Call for Cooperation

- letter from EG Director, 31 Oct. 2018 to its members
- EuroGeographics is not an operational business, but it wants to facilitate access to its members' geospatial data and services
- Open ELS project (to respond to user demand from institutions of the EC):
  - priority themes: cadastral index map, Open ELS Regional Gazetteer Service, Open EuroGlobalMap (EGM) data as a service, and feature services of Addresses, Buildings, and Transport data
  - first release with data from Czech Rep., Denmark, Finland, Norway, Spain, The Netherlands, Belgium
  - content and coverage are key

# Thank you for your attention!
