

An aerial photograph of a multi-lane highway interchange. A white wireframe grid is overlaid on the scene, consisting of a series of interconnected triangles and quadrilaterals that follow the curves and straight sections of the road. The surrounding landscape includes green grass, trees with yellow and orange autumn foliage, and a rocky embankment.

Deliverables

CY, GE, GR – delivered

RO, MD – edgematching

UA – delivered, update in process

BG – RC will update the database using all data

Validation

All data producers use validation tools

Issue with “out of bounds” error

Issues with big datasets

Data quality

Very high

EBM boundaries for MD dataset
