# Setting the scene

- **Relevant European Commission Policy, *Carol Agius***
- **Previous work on User requirements, *Angela Baker***

# European Commission Priorities

## A European Green Deal

Europe aims to be the first climate-neutral continent by becoming a modern, resource-efficient economy.

## A stronger Europe in the world

The EU will strengthen its voice in the world by championing multilateralism and a rules-based global order.

## A Europe fit for the digital age

The EU's digital strategy will empower people with a new generation of technologies.

## Promoting our European way of life

Europe must protect the rule of law if it is to stand up for justice and the EU's core values.

## An economy that works for people

The EU must create a more attractive investment environment, and growth that creates quality jobs, especially for young people and small businesses.

## A new push for European democracy

We need to give Europeans a bigger say and protect our democracy from external interference such as disinformation and online hate messages.

# Conversation with the Users

Digital Europe Programme  
Grant Agreement No 101100625

# Conversation with the Users

## – *Facilitated break out session*

- **Understanding the users –**
  - What do you do in your day-to-day jobs?
  - What are you using geospatial data for?
  - How does this fit into your job?
- **Understanding the data needs –**
  - What data do you need in an ideal world?
  - What data do you need to support you in your job?
  - How can the data help you achieve your day-to-day actions? (use cases and user requirements)
- **Managing the expectations –**
  - NMCA authoritative data – are they responsible for that data?
  - Within the scope of the OME2 project
