The Open Cadastral Map

<https://www.mapsforeurope.org/datasets/cadastral-all>

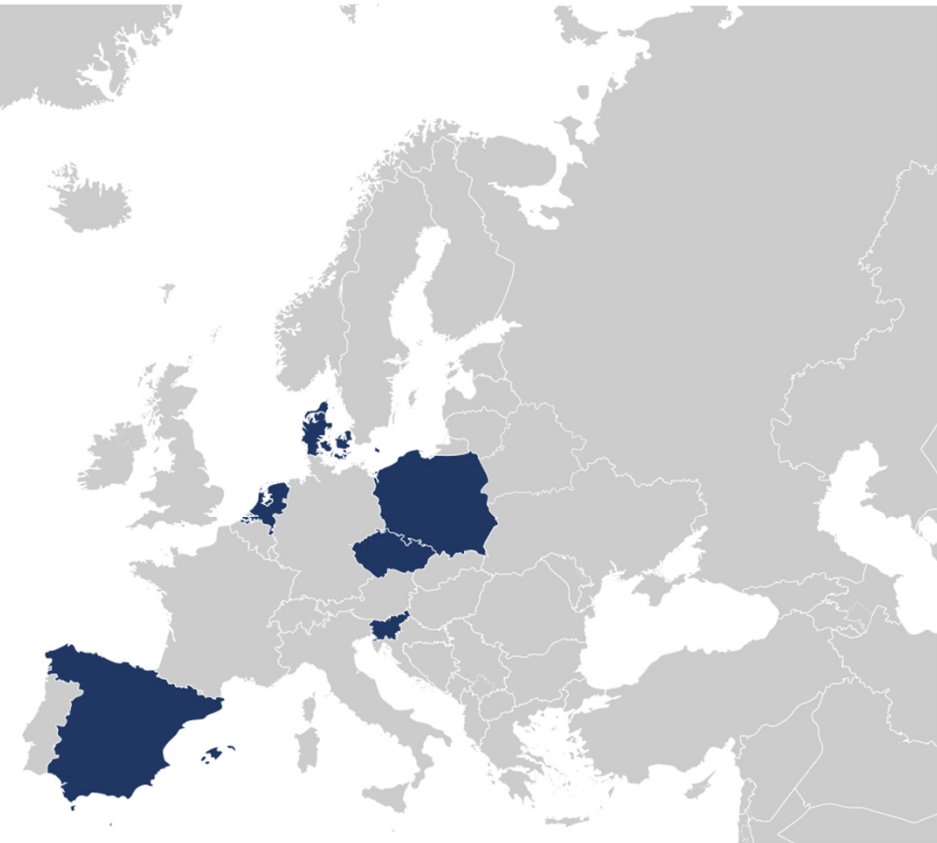

HVD: Cadastral Parcels, Buildings, Addresses and Administrative Units

Sustain: Currently data from 6 countries provided through the OME interface

The OME 2 Open Cadastral Map project will build on the successful results of the OME project

Extend: 9 additional countries

Enhance: New functionalities

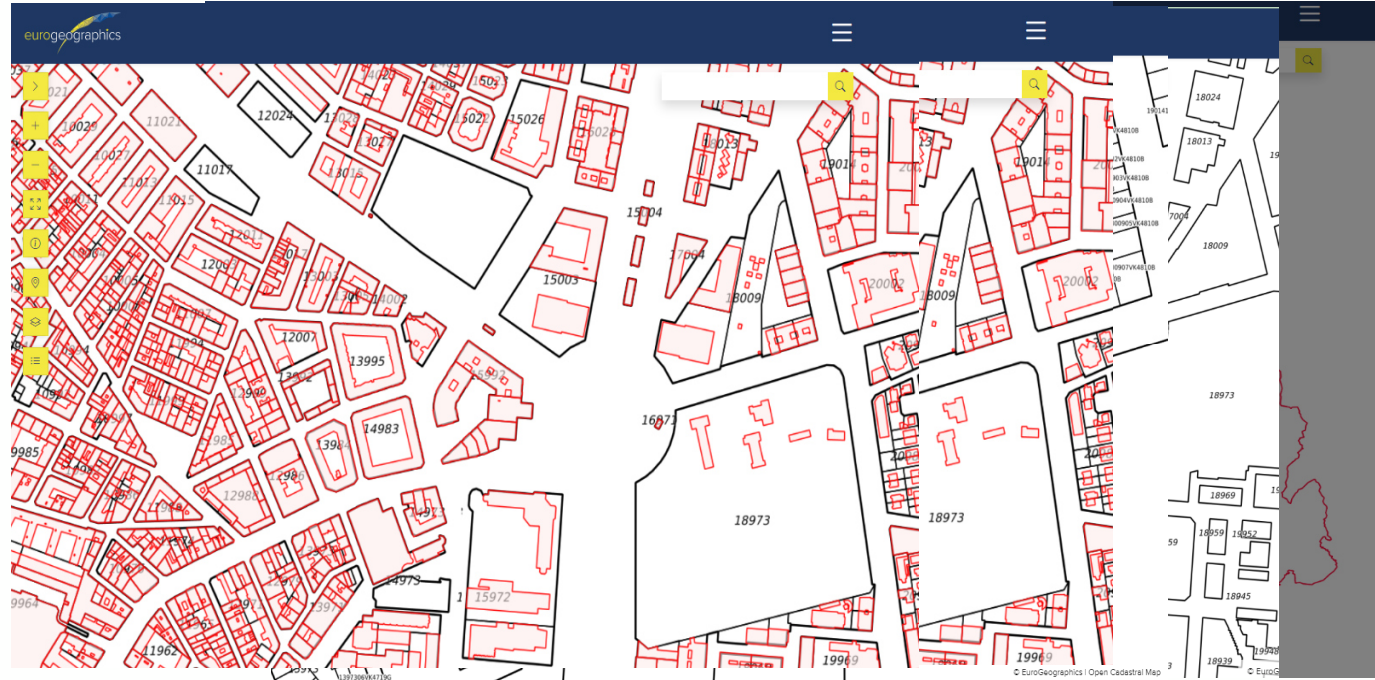

Czech Republic
Denmark
Netherlands

Poland
Slovenia
Spain

OCM current view and features

- Administrative Units
- Cadastral Zoning
- Cadastral Parcels
- Building
- Building Part
- Addresses

All these themes are defined as part of the High Value Datasets

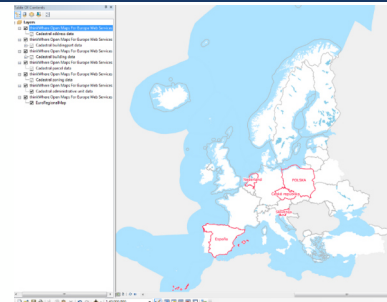

They can generate significant socioeconomic and environmental benefits

They are of great interest to the European Commission and its Services, to private sector companies and citizens.

OME 2 – Open Cadastral Map (OCM) project

Duration of the project: 3 years

Project tasks:

- Continue the operation of the Open Maps for Europe platform
- Expand its data and functionalities both for the countries already on the map and for the new ones
- Increase OCM's coverage by 4 new countries by 31st Dec 2024 and 5 additional countries by 31st Dec 2025
- Increase the harmonisation of the access to cadastral data
 - Document cadastral data
 - Develop user-oriented description of the datasets offered by OCM
 - Metadata Quality Assurance (**F**indability **A**ccessibility **I**nteroperability **R**eusability)

Note: The layers of the OCM are those provided by NMCAs contain the authoritative information that shows legal or official boundaries. No cross-border automated edge-matching procedure applies.

- The potential for edge-matching handling will be investigated

OME 2 – Open Cadastral Map (OCM) project (cont'd)

Duration of the project: 3 years

Project tasks:

- Enhance further the awareness of the Open Cadastral Map and its usefulness to cadastral communities
- Develop a long term pan-European strategy in delivering cadastral data.
 - specifying common deliverables and
 - applying standardisation approaches in order to homogenise datasets that are going to be integrated in the OCM.
- Develop guidelines about best practices for cadastral agencies and users
- Identify current and future OCM users (public and private organizations, companies and citizens), as well as, related needs.

National Cadastral Agencies' approval and engagement are essential for the project's future operation and further improvement.

Prerequisites for incorporating data in the OCM

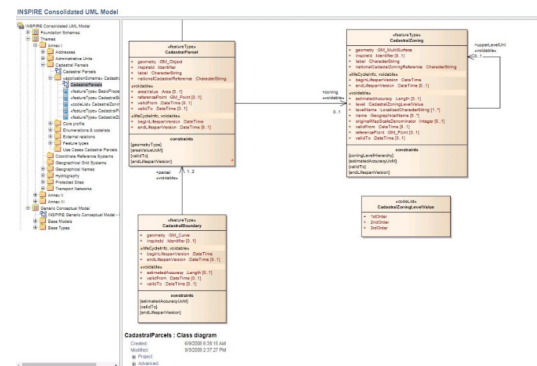

- Availability of the Cadastral Parcel Dataset
- Compliance with the INSPIRE Directive’s specifications
 - *Data*
 - <https://inspire.ec.europa.eu/id/document/tg/cp>
 - <https://inspire.ec.europa.eu/data-model/approved/r4618-ir/html/>
 - <https://inspire.ec.europa.eu/schemas/>
 - *Metadata*
 - [Technical Guidance for the implementation of INSPIRE dataset and service metadata based on ISO/TS 19139:2007](#)
- No restrictions on public access and use for the provided data
 Datasets available for reuse under the conditions of the Creative Commons BY 4.0 license or any equivalent or less restrictive open license

Nice to have for incorporating data into the OCM project

Download Service :

INSPIRE ATOM Feed Service with a gml in a zip file available for download

<https://inspire.ec.europa.eu/documents/technical-guidance-implementation-inspire-download-services>

Dataset format :

GML format & INSPIRE endorsed Schemas

<https://inspire.ec.europa.eu/schemas/>

All the rest of the Open Cadastral Map themes

- Administrative Units
- Buildings
- Building Parts
- Addresses

Digital Europe Programme
Grant Agreement No 101100625

Some requirements are easy to achieve

In case you want to participate but you think your data don't meet the requirements.

We encourage you to contact us to discuss further details.

Examples:

- If datasets are in other formats rather than in gml
 - Transformation might be feasible through simple programming
 - Or easily accessible transformation tools
- If datasets are available for download but not via INSPIRE ATOM Feed Service
 - The implementation of INSPIRE ATOM Feed Service is not so complex
 - The ATOM FEED must follow INSPIRE Download Services Technical Guidance

<https://inspire.ec.europa.eu/documents/technical-guidance-implementation-inspire-dov>

What makes OCM an important project

- Provides pan-European cadastral data access from a single point and addresses the challenge of
 - finding
 - easily accessing and
 - licensing authoritative and up-to-date pan-European high-value geospatial data.

Note: *Whilst EuroGeographics update the Open Cadastral Map every six months, the data from the Cadastral Agency may be updated on a different frequency cycle.*

- Saves users time, effort and resources by providing harmonized data from multiple countries through one central portal.
- Demonstrates how demand for geospatial information in all common data spaces of the European Strategy for Data can be met.

Why it's important to participate

The OCM aims to :

- **provide** users with a simplified and harmonised web service of the INSPIRE themes Cadastral Parcels (CP), Buildings (BU), Addresses (AD) and Administrative Units (AU).
- **establish** a unified pan-European cadastral map
- **constitute** a fundamental layer of authoritative data in Europe (High Value Datasets).
- **satisfy** the everyday needs of a wide spectrum of users
- **support** NMCAs in implementing rules for the Open Data by re-using OME2 techniques nationally and sharing good practices.
- **increase NMCAs' prominence** as key authoritative data providers in Europe

Find out more about the OCM and Get involved

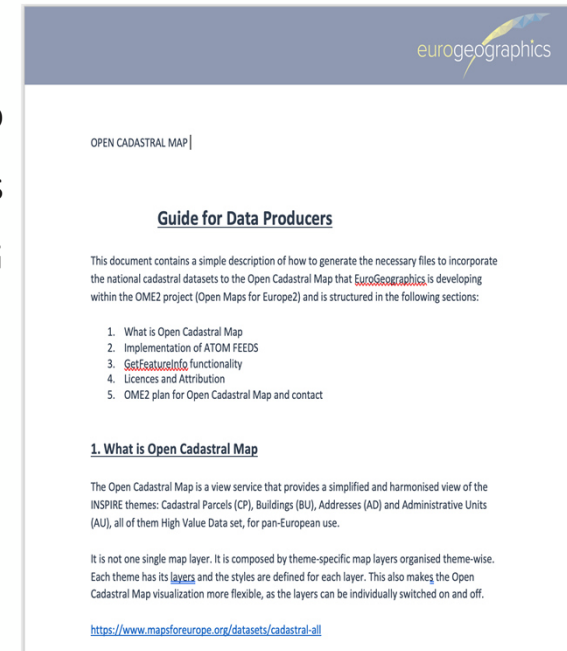

- **Guide for Data Producers:**

An informative document describing how to generate the necessary files to incorporate your country's national cadastral datasets to the Open Cadastral Map is developed within the OME2 project and will be distributed to participating EG members

- **Eurogeographics Informational Webinar on June 21st**

The Work Package 6 team of the OME 2 project will:

- Give a presentation on the technical and procedural aspects of the project
- Demonstrate the currently available features on the OCM
- Provide answers to your questions
