

GeoAI and Beyond: Advancing the UN Sustainable Development Goals within the AI for Good Global Platform

Andrea Manara

International Telecommunication Union

Artificial Intelligence for NMC

Joint Workshop organised by EuroGeographics and EuroSDR

27 September 2023

- The ITU and AI for Good
- GeoAI activities
 - Discovery Channel
 - Body of Knowledge
 - Challenges

The International Telecommunication Union

ITU-R global management of the radio-frequency spectrum and satellite orbits

ITU-T technical standards to ensure ICT networks and devices interoperability

ITU-D improve access to ICTs to underserved communities worldwide.

General Secretariat corporate functions and strategic planning

Membership

- 193 Member States
- Almost 800 private-sector entities and academic institutions

THE leading action-oriented, global & inclusive
United Nations platform on AI

ALL YEAR, ALWAYS ONLINE + PHYSICAL SUMMIT

■ Organized by

■ 40 UN Organizations

■ Co-convened by

Accelerating UN SDGS

Less than 10 years to achieve
the United Nations Sustainable
Development Goals.

AI holds great promise.

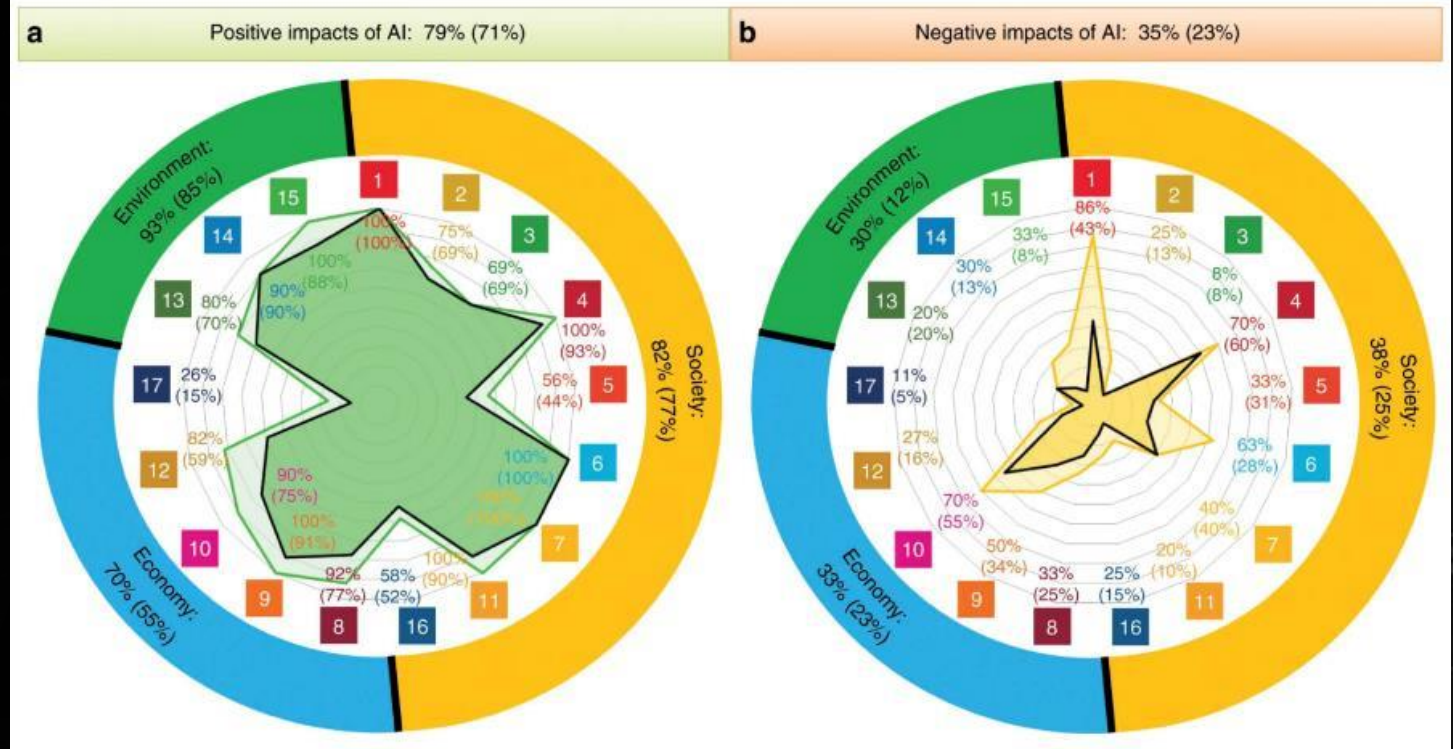

Mapping AI to SDGs

AI can help to **positively impact 134 targets** across all the goals.

AI can also **inhibit 59 targets**.

Fig. 1: Summary of positive and negative impact of AI on the various SDGs.

AI for Good | Multi-stakeholder

Interdisciplinary

Inter-generational

AI for Good | Influential Audience

- Leading minds in AI
- AI philosophers, authors, scientists, engineers
- C-level industry leaders, founders and presidents
- Top AI academic experts
- Heads of UN agencies
- Government officials
- Policy-makers
- Ambassadors
- NGOs & non-profit organizations
- Creative visionaries

Global Summit

*Accelerating the United Nations
Sustainable Development Goals*

30-31 May 2024
Geneva, Switzerland

aiforgood.itu.int/

| 2024 Summit Snapshot

- Focus on solutions, experiences, networking and matchmaking
 - ✓ Headliners, keynotes, Ted-style talks
 - ✓ 2 invitation-only roundtable lunches with UN leaders, government officials, ambassadors & industry CxOs
 - ✓ Leaders Lounge: VIP-to-VIP networking with complimentary refreshments
 - ✓ 3 exciting talk/demo zones: Robotics for Good – SDG stage – Discovery zone
 - ✓ 2 AI start-up pitching sessions with grand prize
 - ✓ Artistic AI performances + competition
 - ✓ VIP receptions & dinners
 - ✓ Expert level pre-Summit ML workshops (27 to 28 May)
 - ✓ AI Governance Day (29 May)
 - ✓ Networking breaks, lunches & social events
 - ✓ In-person & virtual audience
 - ✓ No parallel sessions when main stage is live!

- **GeoAI Discovery** Channel on GeoAI applications, highlighting its relevance to the Sustainable Development Goals.
- **GeoAI Challenge**, a competition aimed at providing solutions for collaboratively addressing real-world geospatial problems by applying artificial intelligence (AI)/machine learning (ML).

Building a foundation for geospatial AI: defining a syllabus and body of knowledge

 5 July 2023 ● *In person and Online*

Building a foundation for geospatial AI:
defining a syllabus and body of knowledge -
updated on June 15th

 14:00 - 17:30

 Maria Antonia Brovelli (Politecnico di Milano),
Andrea Manara (ITU), Andrew Zolli (Planet)...

 Workshop

Education in GEOAI: a challenge and an opportunity

AI for Good Workshop “Building a foundation for geospatial
AI: defining a syllabus and body of knowledge”
Geneve, 5 July 2023

Prof. Maria Antonia Brovelli
Chair of the UN-GGIM Academic Network
Politecnico di Milano

POLITECNICO
MILANO 1863

Building a foundation for geospatial AI: defining a syllabus and body of knowledge

Expression of interest until October 10th ([Google Form](#)) to participate in the Working Groups

- WP1 – GEOAI Syllabus for developers
- WP2 – GEOAI Syllabus for appliers
- WP3 – GEOAI Syllabus for decision-makers
- WP4 – GEOAI Body of Knowledge

ITU GeoAI Challenge

Everything happens somewhere – applying machine learning to geospatial analysis

To solve real-world geospatial problems by applying artificial intelligence (AI) / machine learning (ML) to advance the United Nations Sustainable Development Goals (SDGs).

AI for Good

ITU GeoAI Challenge 2023

Landslide Susceptibility Mapping

Develop ML algorithms that can analyze large dataset to identify patterns indicating high probability of landslide occurrence and create a landslide susceptibility map.

Curated by **GEOlab at Polytechnic di Milano**

[LEARN MORE](#)

Cropland Mapping

Develop accurate, cost-effective classification model for cropland extent mapping with ML techniques in three test regions.

Curated by **UNODC** (United Nations Office on Drugs and Crime) and **FAO** (Food and Agriculture Organization of the United Nations)

[LEARN MORE](#)

Air Pollution Susceptibility Mapping

Implement a machine learning method which can accurately estimate the pollution levels (AQI) of the metropolitan city of Milan

Curated by **GEOlab at Polytechnic di Milano**

[LEARN MORE](#)

The Hyperview Challenge

Estimating soil parameters from hyperspectral images.

Curated by **ESA** (European Space Agency)

[LEARN MORE](#)

Location Mention Recognition (LMR)

This challenge aims at automatically extracting toponyms (places or location names) from the given text.

Curated by **QCRI** (Qatar Computing Research Institute), **QU** (Qatar University), and **Oen Labs Inc.**

[LEARN MORE](#)

Problem statement	Organizations	Participants	Prize	Days to go
Cropland Mapping	FAO, UNODC	302 (59)	4000 USD	9
Air Pollution Susceptibility Mapping	<u>Geolab</u> (Politecnico di Milano)	163 (22)	1000 USD	19
Landslide Susceptibility Mapping	<u>Geolab</u> (Politecnico di Milano)	174 (14)	1000 USD	9
Estimating soil parameters from hyperspectral images	ESA <u>Φ-lab</u> together with <u>KP Labs</u> , and partner <u>QZ Solutions</u>	66 (6)	1000 USD	60
Location Mention Recognition (LMR)	QCRI (Qatar Computing Research Institute), QU (Qatar University), and Qen Labs Inc.	94 (15)	1000 USD	27

AI for Good

ITU GeoAI Challenge 2023

Air pollution susceptibility mapping in Milan, Italy

POLITECNICO MILANO 1863

Angelly Pugliese-Viloria

PhD student in Environmental Engineering at Polimi and consultant at the World Bank.

Make cities and human settlements inclusive, safe, resilient and sustainable

Take urgent action to combat climate change and its impacts

Landslide susceptibility mapping in Northern Italy

POLITECNICO MILANO 1863

Vasil Yordanov, PhD

Research Fellow at the Department of Civil and Environmental Engineering at Politecnico di Milano.

Make cities and human settlements inclusive, safe, resilient and sustainable

Take urgent action to combat climate change and its impacts

Cropland mapping with satellite imagery

Dr. Pengyu Hao

Officer
Digitalization and
Informatics Division, FAO

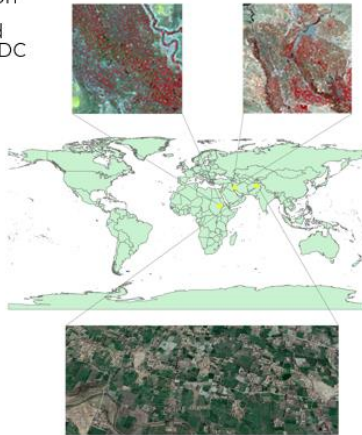

Lorenzo Vita
Geospatial Information
Officer
Research and Trend
Analysis Branch, UNODC

Food and Agriculture
Organization of the
United Nations

UNODC
United Nations Office on Drugs and Crime

Develop accurate, cost-effective classification model for cropland extent mapping with ML techniques in three test regions.

Location Mention Recognition (LMR) from Social Media Crisis-related Text, Qatar

Hamad Bin Khalifa University (HBKU), a member of Qatar Foundation for Education, Science, and Community Development (QF), was founded in 2010 to continue fulfilling QF's vision of unlocking human potential.

Qatar Computing Research Institute (QCRI) is a national research institute, established in 2010 by QF. QCRI operates under the umbrella of Hamad bin Khalifa University (HBKU).

Qen Labs © Inc. is a Geospatial AI (GeoAI) company focused on enabling and measuring growth towards Sustainable Development Goals (SDG) through the fusion of geospatial data with other public and private datasets. They develop AI algorithms that leverage the spatiotemporal attributes of both structured and unstructured data to provide actionable insights.

Reem Suwaileh
Research Associate @ HBKU

Muhammad Imran
Senior Scientist @ Qatar Computing
Research Institute (QCRI-HBKU)

Lokendra Chauhan
Founder & CEO, Qen Labs Inc.

This challenge contributes to the SDGs 10 and 11.
