Republic of Latvia

# THE MOST IMPORTANT MILESTONES TOWARDS OUR NEW CADASTRE

---

**Vents Priedolins**  
Cadastre Development Manager

Bruges, 2024

**641** Employees all over the country

**1** Central Administration

**5** Regional administrations

**15** Customer service centres

# Areas of responsibility

**Cadastre**

❖ **Real estate  
market  
database**

**Address  
register**

**Information  
system  
of restricted  
territories**

**Central  
database of  
High-detail  
topographic  
information**

**Mass  
cadastral  
valuation**

**Cadastral  
surveying**

**Land  
reform**

# Cadastre At a glance 2023

Objects  
registered  
in total

Real estate

**1 495 355**

Land parcels

**1 041 551**

Buildings

**1 553 748**

Objects,  
registered  
in 2023

Real estate

**17 822**

Land parcels

**8937**

Buildings

**22 053**

# Textual data of cadastre

For land

For buildings

For groups  
of premises

The cadastral  
value for each  
cadastral object

# Textual data of cadastre

## For land

- the purpose of use,
- encumbrances,
- types of land usage and distribution by areas,
- total area etc.

## For buildings

## For groups of premises

## The cadastral value for each cadastral object

# Textual data of cadastre

## For land

- the purpose of use,
- encumbrances,
- types of land usage and distribution by areas,
- total area etc.

## For buildings

- main purpose of use,
- deterioration of structural elements,
- material,
- distribution of areas (residential/non residential groups of premises) etc.

## For groups of premises

## The cadastral value for each cadastral object

# Textual data of cadastre

EU Fund Project proposal submitted to the Ministry of Justice

**August 8  
2020**

The Agreement on implementation of the EU Fund project signed

**November 16  
2021**

Procurement for the development of the modernisation of Cadastre announced

**December 28  
2022**

Cadastre transformation strategy approved

**August 28  
2023**

**March 29  
2021**

EU Fund Project proposal submitted to The Central Finance and Contracting Agency (CFCA)

**March 29  
2022**

An open tender for information and communication technology services within the EU Fund Project announced

**July 7  
2023**

Contract with the developers Visma Consulting SIA un SIA CODEX signed

**December  
2023**

**EU Fund Project completed**

# Achievements

## Land parcels and parts of land parcels

- ❖ Registration and updates  
→ 4 processes

## The map

- ❖ Spatial data (of cadastral objects) migration

## The workflow

- ❖ Integrating the workflows of our processes

## Data distribution network (DDN)

- ❖ Cadastral data distribution in the DDN

## Cadastral values

- ❖ Data preparation for mass valuation

# The budget

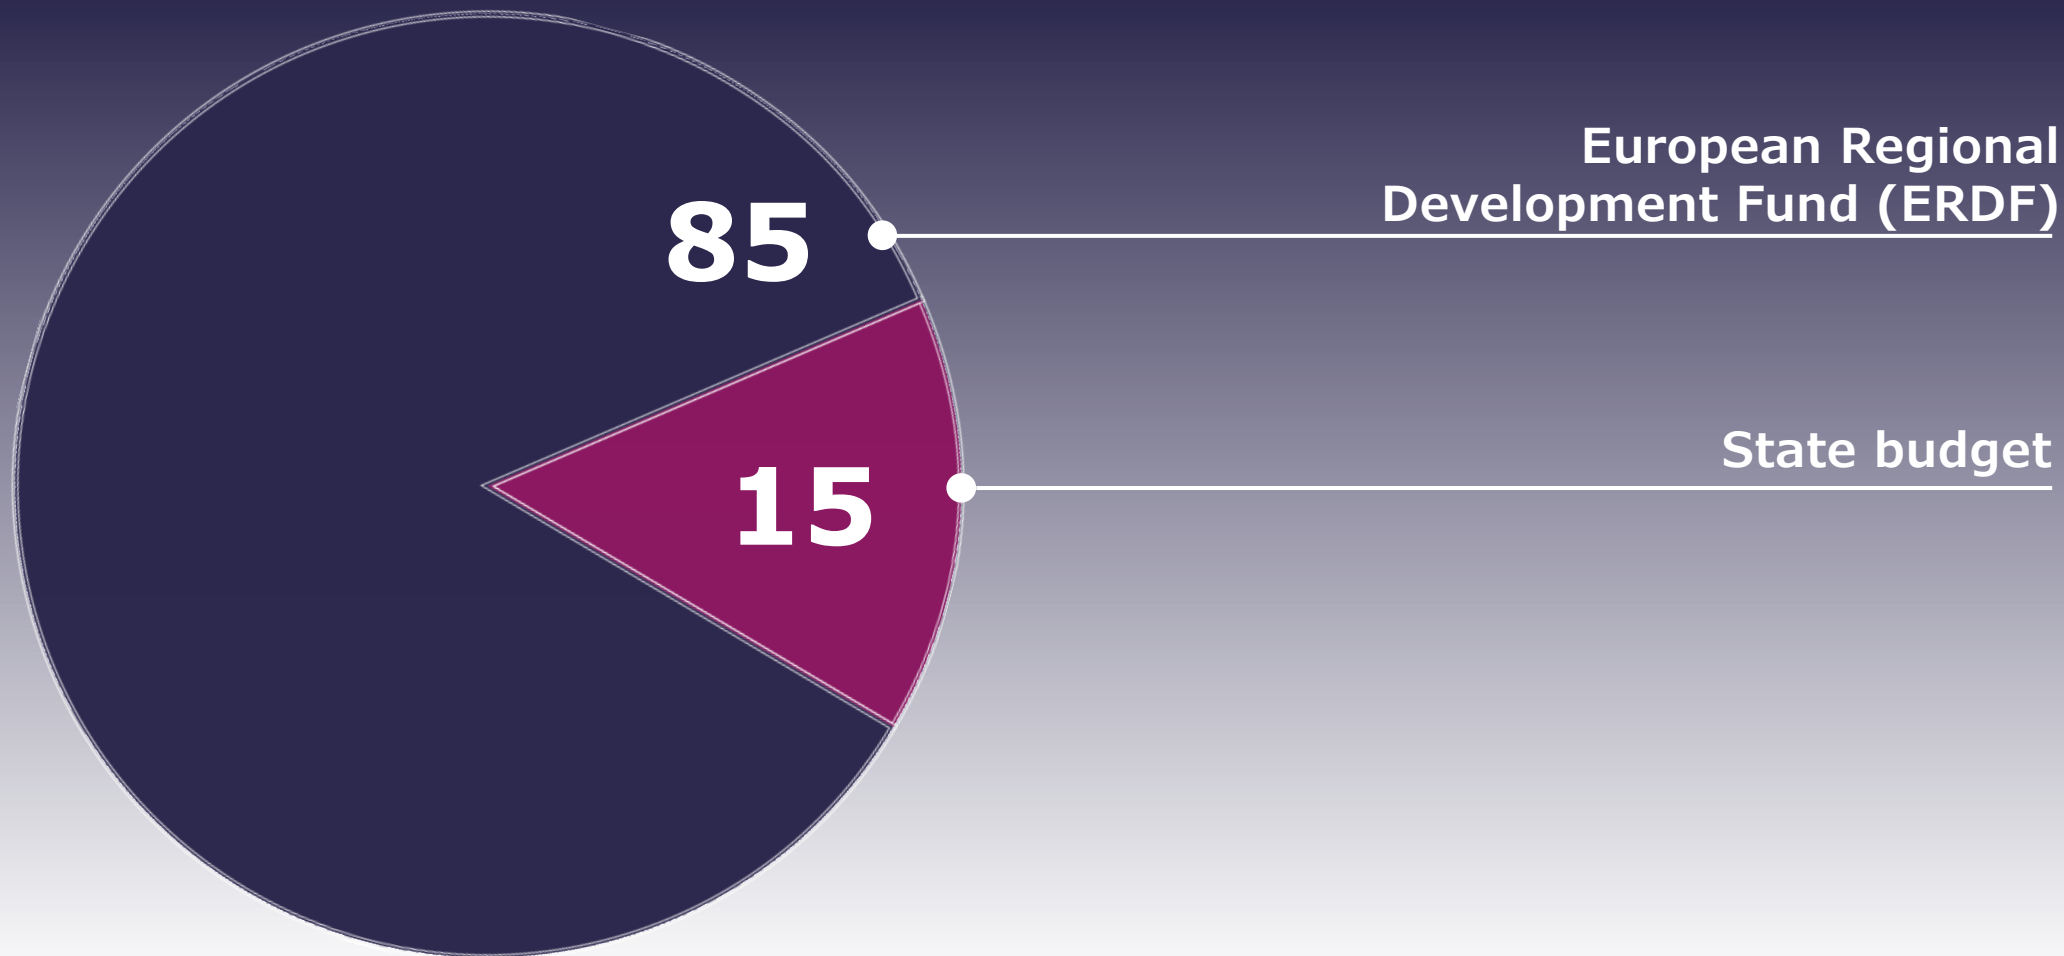

- To mitigate the risks, we have waived

---

- **Total project cost**

**1 million € in 2023**

**2 899 500,00 €**

# KADIS project achievements

**Improved operational processes**

**8**

**Data migration to the State Cloud infrastructure solution**

**1**

**Improved data exchange between Cadastre and other IS**

**3**

**New e-service created**

**1**

**Datasets available on the Open Data Portal**

**10**

# **KATE**

## **a new technological solution for cadastral map**

- 5 months from idea to result!
- Technological solution based on PostgreSQL PostGIS database
- Working environment designed in QGIS v3.34 software

*For the previous KRIS GP solution Bentley MicroStation V8.1. was used and platform was based on Oracle database 10g*

## Benefits of KATE

- Significant financial benefits by waiving licence costs
- The possibility to use the latest and most up-to-date technology
- A communication site made in a Webex environment where data operators communicate with each other, exchange knowledge and receive immediate support from IT support staff
- OGC standard implemented

# Technical improvements

- Data specification changed
- Data storage fully centralised now
- Separation of the working database from the underlying database
- More complete topological data validation introduced
- Improved ability to store and view historical data
- A number of new validations have been developed, both in the database and in the working environment
- Various raster and vector backgrounds available in QGIS formats can be connected to the working environment

# Challenge

Inclusion of **the Address Register** data and data of **the Restricted Territory Information system** in the same technical solution which is used for the Cadastral map.

## .. another challenge

Development and design of a new online portal for our data and services

# Cadastre in your pocket

🔍 [www.kadastrs.lv](http://www.kadastrs.lv)

## Self service portal

- ❖ Working place, services, accessibility – primarily without involvement of the SLS

## Simplicity in design

- ❖ Easily understandable, well structured, intuitive and functional

## User oriented

- ❖ Meets the needs of modern society, user friendly

## Modern and safe

- ❖ Meets modern technology and security requirements, interoperable and easy to administer

# The roadmap for the portal development

**MARCH-APRIL**

- Summary of customer and partner needs (opinion polls)
- Work on the Conceptual vision
- Key requirement proposals

**MAY-JUNE**

- Brainstorming within SLS
- Summary of key requirement proposals
- Presentation of the conceptual vision

**JULY-SEPTEMBER**

- Discussion with customers and partners
- Final version of the conceptual vision

**OCTOBER-DECEMBER**

- Specification and requirements fully set
- Start of the development phase which will continue in 2025
