Project Presentation

Antonio Filograna

Engineering Ingegneria Informatica

Transforming & Exploiting High Value Datasets
19th November, Webinar

beopen-dep.eu

Snapshot

- **BeOpen Framework** will enable the development of new digital and AI services by facilitating access to and use of EU Public Sector High Value Datasets (HVDs).
- **8 pilots** will address mobility, urban security, environment, and natural disasters challenges in several EU regions.
- The project is now at **Month 18** and Pilots are starting to use the Framework to improve their data.

Duration: 30 Months

Jan 2023 – Jun 2025

Budget: 7.447.000 €

Funding 50%

Digital Europe Programme

DIGITAL-2022-CLOUD-AI-02

Consortium: 17 Partners

+1 Associated Partner

Context overview

Home > Policies > A European strategy for data

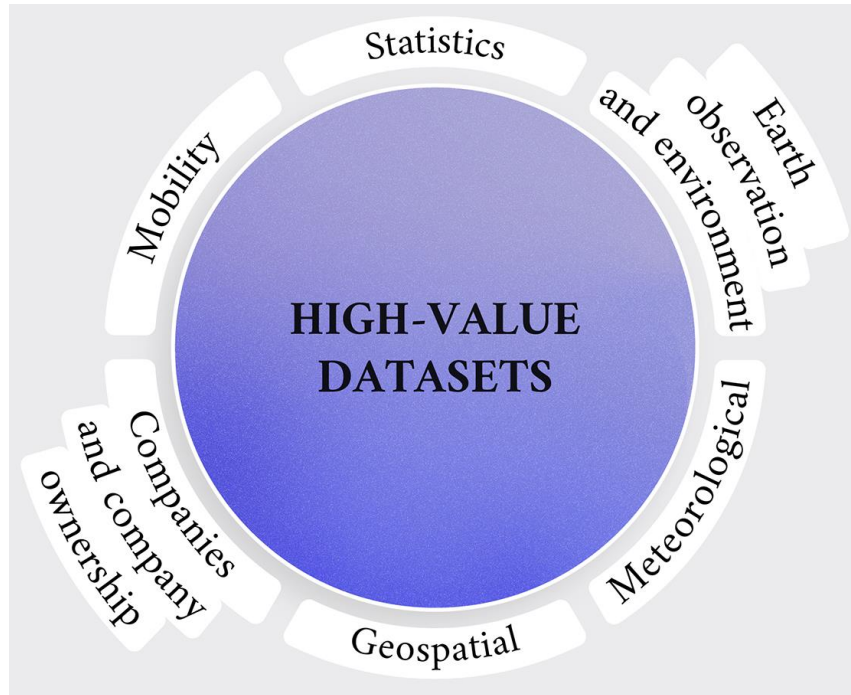

A European strategy for data

The strategy for data focuses on putting people first in developing technology, and defending and promoting European values and rights in the digital world.

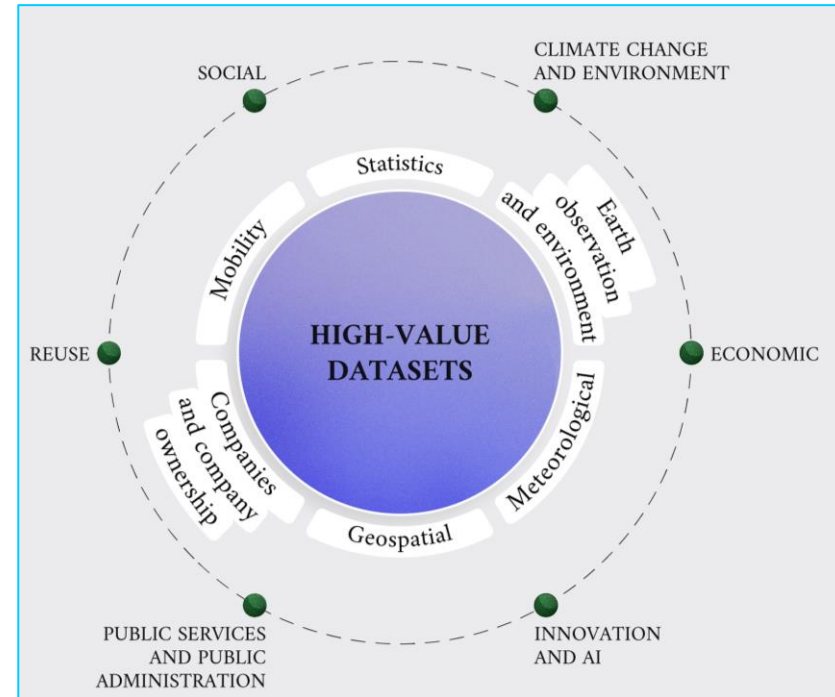

- The concept of **High Value Datasets** (HVDs) is central to the EU's strategy for leveraging data as a key asset in the **digital economy**.
- Certain datasets (such as geospatial, environmental, statistical, and other crucial domain) hold significant potential for creating **economic value**, driving innovation, and **improving public services**.
- The need for HVDs arises from the increasing demand for **data-driven decision-making** across various sectors.
- Ensuring that these datasets are **open, standardized, and interoperable** across member states can enhance their usability, promote **cross-border applications**, and ultimately support the EU's broader goals of **digital transformation** and sustainable growth.

Challenges

The current challenges in the Public Sector are opportunities for BeOpen to

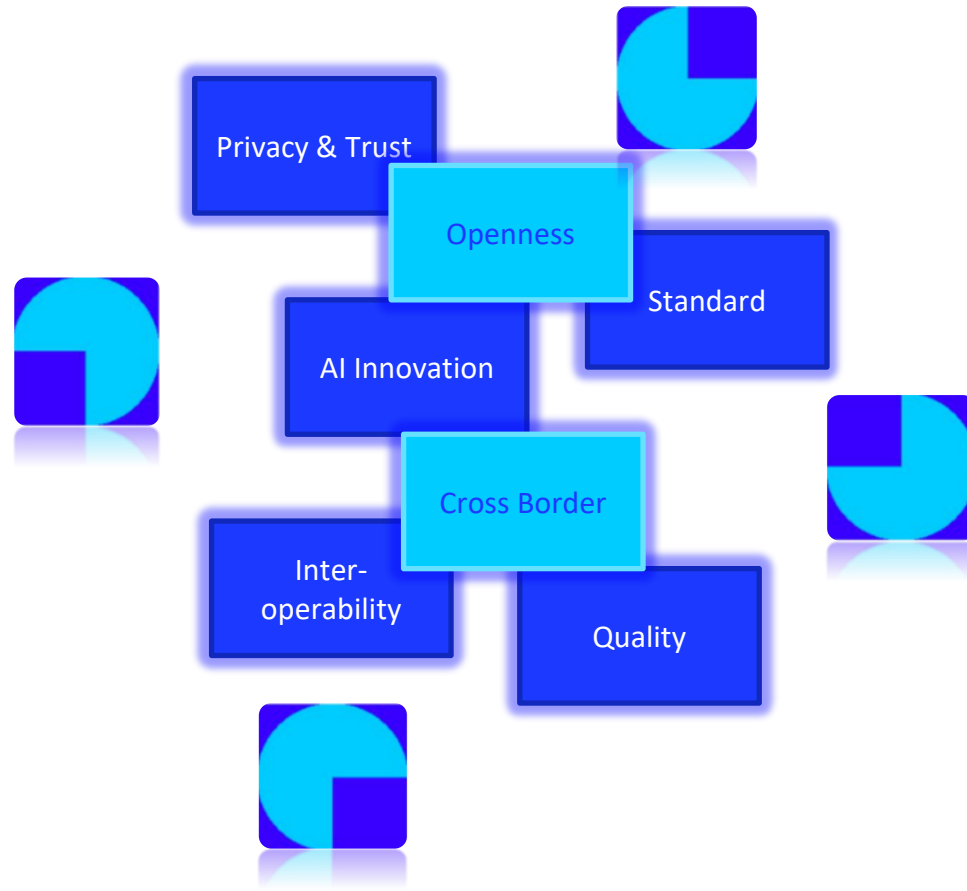

- Become the **catalyst of Open Data** existing in public administrations.
- Improve **data sharing**, interoperability, **availability & usability of data sets** in different sectors.
- Engage a **community of stakeholders** thanks to sister EU Projects and partners' networks.
- Build on expertise from **previous projects**, FIWARE open-source components and SMEs / start-ups leaders in data exploitation.

Cefat4Cities

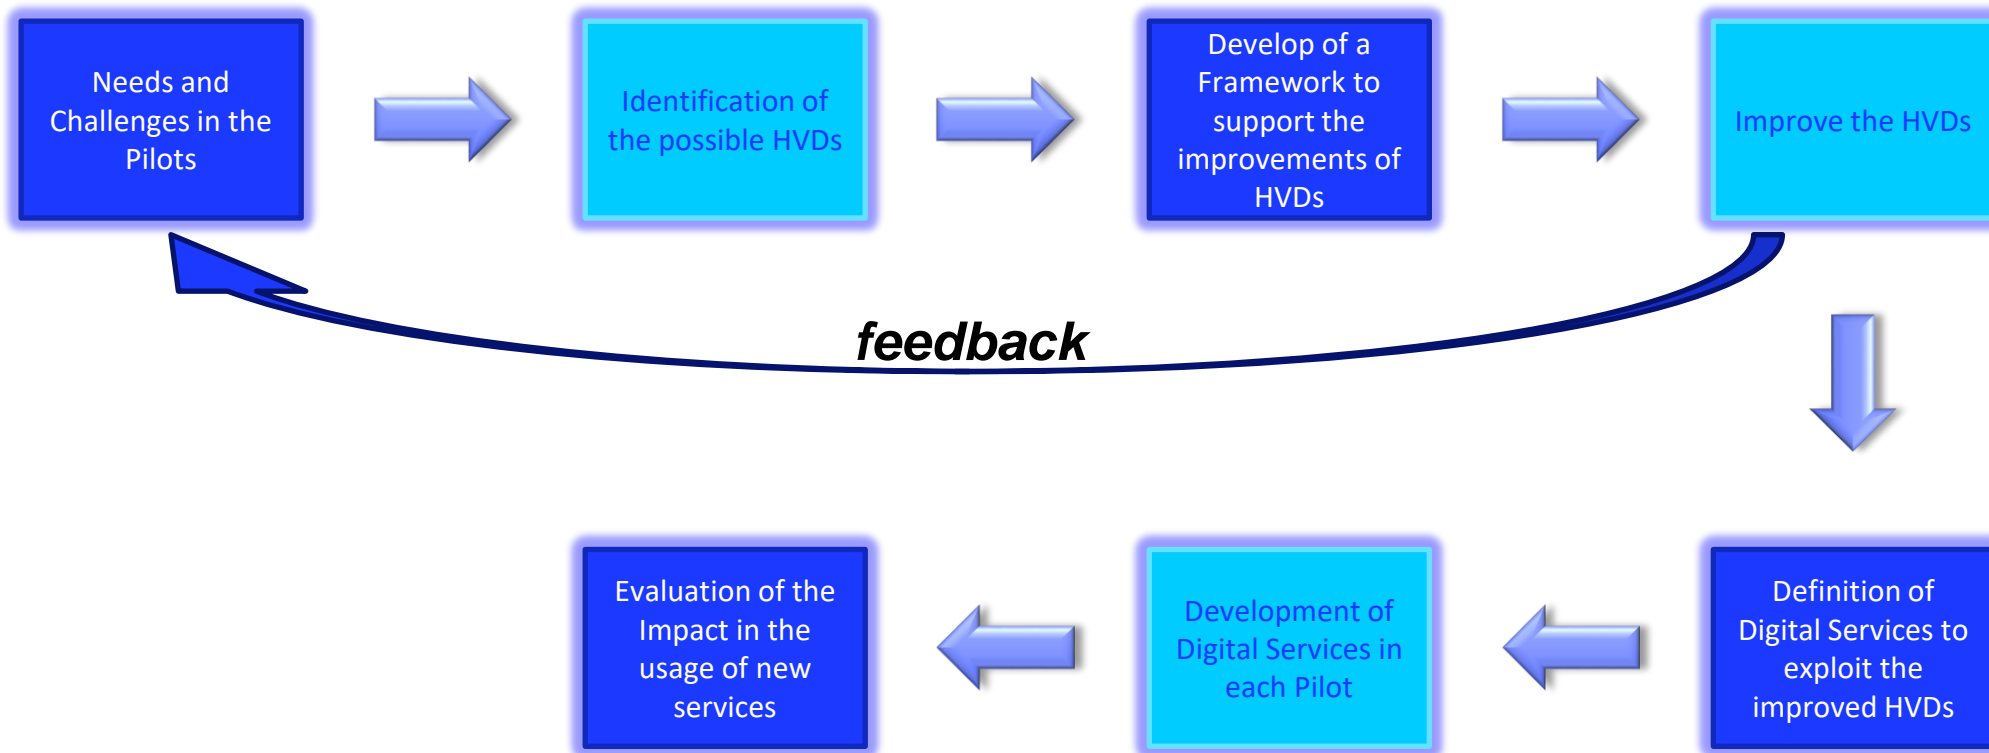

BeOpen solutions to overcome challenges

- **Technical framework** for data interoperability covering the complete pipeline from data collection, quality improvement, semantic enrichment, to data provisioning and publication.
- **Catalogue of High Value Datasets (HVD)**, public Open Data available and accessible for the creation of new services and AI applications.
- **Guidelines and recommendations** - Legal interoperability of data.

BeOpen Methodology

Testing the results in 8 Use Cases in 6 different EU regions

Napoli (IT)
Integrating
Mobility Data
and Urban
Environment
Information for
Decision
Making

Attica (GR)
Creating a
"shield" from
natural
disasters for the
region's citizens
and
environment

Herne (DE)
Improving AI-
tools for street
management
and crowd
safety at major
events

Cartagena & Torre Pacheco (SP)
Urban security
in historical
cities with key
critical
infrastructure

Climate change
mitigation
actions: Urban
Heat Islands &
Heatwaves

Molina de
Segura (SP)
Sustainable
introduction of
LED lighting and
its impact on
health

Porto (PT)
Assessing the
impact of
incidents with
urban mobility
data

Vilnius (LT)
Invading
species
detection and
projected
expansion

Meetings with cities, selection of KPIs, data collection (stakeholder survey, interviews, focus group, data analytics, opinion mining)

How the HVDs can support the data sharing in cities?

Valuable data

Standardized data

Interoperable data

Easily accessed by
different
stakeholders
