

Welcome

SDQ 2020: International Workshop on Spatial Data Quality Data Maturity - Geo Data Growing Up 28th January 2020

Changing World

- A Dynamic World – Propelled by Innovation in IT
- IT changing how people live and the way people do business.
- There is increasing demands to adopt new ideas, techniques, improvements and innovations.

Drivers

- The goal is to increase competitive value by increased automation
 - Deliver greater economic value
 - Increase the effectiveness of evidence based decision/policy-making
 - Cement the primary purposes of that organisation and it's data
- Deliver growth and innovation for organisations using data

How

- Positioning data as a strategic enterprise/national asset.
- Appointing Chief Data Officers
- Building on existing geospatial data infrastructures driving data collaboration, automation, transformation and visualisation
- Build data strategy that aligns with business strategy

Defensive Data Strategy

- Ensure data integrity, quality, compliance. Applying standards. Defining and governing authoritative data sources
- Single source of truth
- Control

Offensive Data Strategy

- Improve competitive position. Optimise analytics, transformation, enrichment, availability.
- Viewing Data as a strategic enterprise asset
- Flexibility

A measure of the organisations maturity (people, process and technology)

Element 0: Initial

Principle: Undefined data management process

Usage: Data management focused on specific solutions or reliant on key people

Element 4: Optimised

Principle: Optimised data management

Usage: Continuous feedback, enterprise architecture is optimised

Build a process improvement framework for data assets

- Data Management
- Data Enrichment
- Data Insight

Geospatial data infrastructures have been effective:

- Increasing quality/integrity
- Standardising structures (standards)
- Improving data sharing

Offensive strategies will need these infrastructures to evolve

- Data Enrichment: Augment assets with additional internal and external data
- Flexible: Customise data and transfer data to information
- Data Analysis: Analytics to extract including actionable insights

Join Us For Drinks

Join us at the conference drinks reception
at the **Rosselli Hotel**,

Save the date for our 2020 Smarter Data,
Smarter World Conference: **10th November
2020**
