

# Membership Benefits

## Connecting you to data users, international policymakers and knowledge exchange

EuroGeographics is proud to be the voice of the European National Mapping, Cadastre and Land Registry Authorities. We believe in a society empowered by the use of your official national geospatial services.

We deliver value to you by:

- Facilitating access to your data, services and expertise.
- Representing your interests, regardless of the geographical, technical, political, organisational, linguistic and business parameters in which you work.
- Maintaining a well-established network for sharing knowledge and expertise that helps you to improve your capabilities and role.

## Connecting users to your data

**“Ukraine’s inclusion in EuroGeographics’ datasets not only promotes the integration and use of our national data within the European Institutions, but also demonstrates our commitment to international collaboration.”**

**Oleksii Pinchuk, Head of Directorate for European Integration & International Cooperation, StateGeoCadastre of Ukraine**

We facilitate access to your data, services and expertise by:

- Promoting your data and geospatial services through our online member directory which links to national cadastral and geoportals.
- Creating pan-European datasets using our unique data integration process, which is an important example of international geospatial collaboration.
- Providing pan-European datasets to users including the European Union and its institutions, the United Nations, and through our licensed distributors and value-added resellers (VARs).
- Extending coverage, availability and use of our European datasets by applying for grant funding through EU projects.
- Publicising the benefits of your authoritative data to a wide range of users through a planned programme of marketing and public relations.

## Connecting you to international policymakers

“EuroGeographics has proved its efficiency and strength in providing a European view on specific legal issues related to geospatial information management.”

**Pier-Giorgio Zaccheddu,  
Head of Executive Unit –  
International Affairs, Federal  
Agency for Cartography and  
Geodesy, Germany**

We represent your collective interests and expertise as a well-established and credible authority on European geospatial data from official national sources.

- Providing an engagement service to ensure that your roles, capabilities and concerns are understood in the European institutions.
- Influencing policy and legislation on your behalf in the European Parliament and Commission.
- Delivering information about key European and global policy developments through continuous policy monitoring, tracking and evaluation, including a weekly policy news summary.
- Contributing to UN policy by providing a collective voice for members in UN-GGIM.
- Supporting you in making the case for your authoritative data to your national government, as well as through our networks and partnerships.

## Connecting you to knowledge exchange opportunities

“Participating in my first quality knowledge exchange meeting gave me a lot of confidence and a massive head start in creating my own quality model without this I would not have accomplished my project.”

**Karin Mertens, Quality Officer,  
National Geographic Institute,  
Belgium**

We offer opportunities for organisational and personal continuous professional development through the exchange of experience, ideas and best practice by:

- Providing access to a unique network of peers from across Europe to keep you connected, share knowledge and find solutions to common challenges.
- Delivering a comprehensive programme of knowledge exchange activities, including webinars, workshops, conferences, research papers and best practice guidelines driven by your requirements.
- Contributing to high profile collaborations with major international organisations, relevant associations and partners including UN-GGIM, EuroSDR and PCC.
- Supporting your continuing professional development with activities accredited by the Royal Geographical Society’s internationally recognised Chartered Geographer (CGeog) scheme, which is listed in the EU Regulated Professionals Database.
- Maintaining a searchable library of online resources, in addition to publishing regular member and stakeholder newsletters, an annual review and news releases.
